

EVS workers regularly meet via webinars to spread successful practices

WHAT THEY DO

EVS workers in the Northern California region connect bimonthly to keep up with the region's latest initiatives and share practices. Some of the ones that have been adopted as a result include:

- » tent cards and “right words at the right time,” used by workers to identify themselves and better communicate with the patients whose rooms they clean
- » standardized room and cart set-ups
- » new ways of communicating, identifying and recognizing safe work practices
